

# Concordat to Support the Career Development of Researchers

## **Funder Action Plan**

First published: March 2021

Last updated: February 2024

#### The Concordat and action plan

The <u>Concordat to Support the Career Development of Researchers</u> ('the Concordat') is an agreement between four key stakeholder groups (funders, institutions, researchers, and managers of researchers) aimed at improving support for researchers and research careers in higher education in the UK. The Concordat sets out a number of obligations, for each of the four stakeholder groups, which must be upheld in order for its aims to be realised. The Dunhill Medical Trust became a signatory of the Concordat on 11th March 2020, and as such is committed to upholding those responsibilities targeted at the Funder stakeholder group. One such responsibility, for all signatories, is to publish an action plan within 12 months of signing up to the Concordat.

Our action plan, first published in March 2021, is based on the defining principles of the Concordat: environment and culture, employment, and professional and career development. For each of the outlined Funder commitments, it describes the current situation, including policies the Trust already has in place, as well as the changes the Trust intends to make. The action plan will be updated as appropriate and published.

#### Our vision

The Trust is committed to promoting a dynamic, diverse, and inclusive research system. There is, however, always more work to be done as illustrated in this action plan.

As a funder, the Trust expects organisations affiliated with its awardees to support their researchers and hold similar values. For the values of the Concordat to be successfully implemented, collaboration between the four stakeholder groups is required.

### **Reviewing actions**

A formal review to assess our progress against these actions took place in February 2023, and again in February 2024, with the oversight of our Research Grants Committee. The aim is for the plan to be reviewed at least annually thereafter.

1.	Environment and Culture
